## Abstract

The aim of this deliverable is to give concrete and helpful guidelines to developers implementing user interfaces for the FutureID project. It contains custom Design Patterns, providing practical solutions and examples to the common tasks that have been identified in Del 34.1. Furthermore, the document includes some of the most important usability heuristics, so developers can easily try to consider usability issues right from the start. These guidelines shall serve as a basis for the creation of the UI-concept, the design and eventually the development of the FutureID clients and software components.
