Access to this document does not grant any right or license on the document or its contents. This document or its contents are not to be used or treated in any manner inconsistent with the rights or interests of the FutureID Consortium or the Partners detriment and are not to be disclosed externally without prior written consent from the FutureID Partners.

Each FutureID Partner may use this document in conformity with the FutureID Consortium Grant Agreement provisions.

Abstract

The Broker Service is a central component within the FutureID infrastructure, which aims at decoupling Federation Services and Authentication Services and connecting the FutureID infrastructure to other Broker Services, such as the Pan European Proxy Services (PEPS) developed in STORK or the eID-Broker developed in SkIDentity for example. The present document specifies the requirements for the Broker Service and the Federation Services within the FutureID infrastructure.
