Access to this document does not grant any right or license on the document or its contents. This document or its contents are not to be used or treated in any manner inconsistent with the rights or interests of the *FutureID* Consortium or the Partners detriment and are not to be disclosed externally without prior written consent from the *FutureID* Partners.

Each *FutureID* Partner may use this document in conformity with the *FutureID* Consortium Grant Agreement provisions

Abstract: In this document the specifications of the trust services module in *FutureID* was specified. The trust services will be based on a hybrid approach which makes use of DNS with DNSSEC extensions to build a trust store and get trust information for short lived certificates. For long term validation trust status lists will be used in order to validate the history information of long lived certificates.
