## 2 Introduction

In this deliverable, we will provide details about the implementation of the (Identity) Broker in Claims-Transformer-Mode. We refer to [2, 1] for an introduction to the Broker and assume that the reader is familiar with the concepts and terminology presented there. Furthermore, we refer to [2] for the specification of the relevant interfaces.

Since this deliverable is about details of an implementation and concrete deployment, which may slightly change (e.g., because URLs are updated) during the test and integration phase, this deliverable is constantly updated on its corresponding wiki page: [https://publicwiki-01.fraunhofer.de/Future\\_ID/index.php/D41.4\\_Implementation\\_of\\_the\\_IdB\\_in\\_Claims-Transformer-Mode](https://publicwiki-01.fraunhofer.de/Future_ID/index.php/D41.4_Implementation_of_the_IdB_in_Claims-Transformer-Mode).
