**Abstract:** In this deliverable, we will provide details about the implementation of the generic Execution Environment, which is capable of executing arbitrary authentication protocols, which are described by APS-files, which in turn refer to Basic Services. We refer to D42.6: Specification of execution environment for the specification of the Execution Environment.

This document is issued within the frame and for the purpose of the *FutureID* project. This project has received funding from the European Union's Seventh Framework Programme (FP7/2007-2013) under grant agreement no. 318424.

This document and its content are the property of the *FutureID* Consortium. All rights relevant to this document are determined by the applicable laws. Access to this document does not grant any right or license on the document or its contents. This document or its contents are not to be used or treated in any manner inconsistent with the rights or interests of the *FutureID* Consortium or the Partners detriment and are not to be disclosed externally without prior written consent from the *FutureID* Partners.

Each *FutureID* Partner may use this document in conformity with the *FutureID* Consortium Grant Agreement provisions.

## 1 Executive Summary

In this deliverable, we will provide details about the implementation of the generic Execution Environment, which is capable of executing arbitrary authentication protocols, which are described by APS-files, which in turn refer to Basic Services. We refer to D42.6: Specification of execution environment for the specification of the Execution Environment.
